Preparing for Climate Change in Delaware Change State

View Delaware **Energy and Emissions Data**

This page provides an overview of the steps Delaware is taking to prepare for the impacts of climate change.

In September of 2013, Governor Jack Markell established the Governor's Committee on Climate and Resiliency through Executive Order 41, Preparing Delaware for Emerging Climate Impacts and Seizing Economic Opportunities from Reducing Emissions. The committee is responsible for overseeing the development of an implementation plan for reducing emissions and improving Delaware's preparedness and resilience to climate impacts. Executive Order 41 also requires that all state agencies incorporate measures for adapting to increased flooding and sea-level rise in the siting and design of state-funded projects for new construction and reconstruction of substantially damaged buildings and infrastructure.

Climate Framework for Delaware Finalized: March 2, 2015
